Cyber Pro II™

Second generation of the Cyber Control software contains many new and improved features and functions, including support for both 32/64-bit computer versions, new Easy Stand Alone PRO software and newly designed hardware interfaces with more XLR connectors, SD Card data storage, real time clock and others.

Cyber Pro II is using a new USB-DMX interface with 3 DMX universes + 4 ArtNet universes (via the computer network interface) and miniSD CARD memory. Cyber Pro II is the only interface which is compatible with new Cyber Control II + Easy Stand Alone PRO software and therefore offers multiple extra functions. Cyber Pro II interface come with a powerful standalone features: miniSD card memory, multi-zone, sunset/sunrise and daylight saving function, IR receiver and more.
